

- Install node modules for both Frontend & Backend. ('npm install')
- Run the Backend using 'npm start' command. It will run on localhost Port 3001.
- Run the Frontend application also using the 'npm start' command. It will run on localhost Port 3000.

Initially the Devices UI will open. Here, new devices can be added to the database. All the existing Devices will be displayed below.

The screenshot shows a web browser at localhost:3000. The interface has two tabs: 'LOCATIONS' and 'DEVICES'. The 'DEVICES' tab is active, displaying a form to 'Add New Device' and a list of existing devices.

Add New Device Form:

- Serial Number:
- Device Type:
- Image:
- Status: ☐ Active ☐ Inactive
-

Existing Devices List:

Serial Number	Device Type	Status
DHDDHDH	KIOSK	INACTIVE
JSLKGJMLDSFG	POS	ACTIVE
D5GF5GD665	SIGNAGE	ACTIVE
UH3IU638845	POS	INACTIVE

There are two buttons on the top left corner and top right corner, to navigate between Locations' UI and Devices' UI.
